A NON-PROFIT ORGANIZATION CONNECTING KNOWLEDGE WITH NEED SINCE 1979

Target Audience: Counselors, Social Workers, Psychologists, Case Managers, Addiction Counselors, Marriage & Family Therapists, Nurses, Nurse Practitioners, and other Mental Health Providers

HIGH RISK CLIENTS

Effectively Handle Five of the Most Critical Scenarios You'll Face as a Clinician

Crises are never scheduled, convenient or easy. But they do happen, and you will face them. Clients at risk for crisis often present with so many symptoms and issues, it's hard to know where to start. Many clinicians, anxious about how to proceed, often miss or avoid asking the right questions to effectively intervene and keep clients (and themselves) safe.

As a clinician, have you ever felt:

Worried about the safety of your clients, even feared for their lives, but felt unprepared to handle the situation?

Unsafe in the clinical environment, or unsure of how to handle situations where someone connected to your client might be in danger?

Caught off guard when you're wrapping up a session and a client discloses suicidal thoughts?

Unsure if a client was using drugs and ill equipped to identify the signs and symptoms of drug abuse?

Concerned that you're doing more harm than good for traumatized clients, despite your best intentions?

Join Paul Brasler, LCSW, as he navigates you through five of the most difficult scenarios in mental health today. Through real-life examples and live role plays, Paul will share the concrete strategies that he's used over the last two decades to safely and effectively intervene in the challenging, urgent, and sometimes alarming situations that mental health professionals face. **Full of practical tools and tips, this seminar will teach you to how to make crisis situations more manageable, overcome your worries, and improve your readiness to handle mental health emergencies related to suicide, violence, substance abuse, trauma, and medical issues.** Better still, instruction on professional liability management techniques, tips for documentation, and detailed reproducible assessment forms will have you feeling confident that you can focus on doing what's best for your clients without fear of litigation. And, Paul's guidance is applicable to your work regardless of your setting or clinical background.

Leave this seminar equipped to help your most vulnerable clients with the real-life skills and knowledge they don't teach in graduate school!

SPEAKER

Paul Brasler, M.A., M.S.W., L.C.S.W., has worked in the social work field for the past 22 years. His work experience includes adolescent residential treatment, inpatient and outpatient substance abuse treatment, experiential group process, being a mental health provider on a hostage negotiation team, drug court senior clinician, private practice with individuals and families, and crisis interventions. For the past seven years, Paul has worked in five emergency departments in the greater Richmond, Virginia area conducting psychiatric assessments of patients in crisis. Paul helps the most vulnerable population in his community, and he enjoys the intersection of mental health, substance abuse and medicine.

A graduate of Virginia Commonwealth University's Graduate School of Social Work, Paul returned to his alma mater to teach in 2012. While he readily acknowledges the need for coherent and means-tested theories to support practice, he ultimately values the live experience of putting strategies into practical use. Seminar attendees consistently note that they like how he uses "real life" examples in his presentations.

Speaker Disclosures:

Financial: Paul Brasler is in private practice. He receives a speaking honorarium from PESI, Inc.

PESI Inc. is proud to offer this seminar (at these locations only) free of charge (on live seminar tuition) for veterans and active duty military personnel. **Advanced online registration required.**

OBJECTIVES

1. Complete a comprehensive mental health assessment that encompasses a multitude of clinical concerns including mental status, lethality, substance abuse and trauma.
2. Identify signs of and risk factors for suicidal ideation in clients and effectively respond in order to ensure the safety of the client.
3. Recognize indicators of substance intoxication, withdrawal and overdose in clients and establish protocol for responding appropriately.
4. Assess for risk of violence in a clinical setting and develop skills to effectively and safely intervene during an acute crisis.
5. Examine ways in which client responses to trauma are often misdiagnosed as mental health disorders and consider the clinical implications of this.
6. Create accurate and comprehensive documentation of clinical crises to protect all parties involved and minimize liability risks.
